Summary

Marketing student turned full stack/MERN stack software developer, soon to be finished with the UCF Coding Bootcamp in June 2022. Currently based out of Orlando, Florida and currently looking to relocate to Seattle, Washington for my first role.

Technical Skills

Languages: JavaScript ES6+, CSS3, HTML5, SQL, NoSQL

Applications: GitHub, MongoDB, MySQL, Heroku

Tools: Express, React, Node, Mongoose, Sequelize, Handlebars, Jest, JQuery, Bootstrap, Tailwind CSS

Projects

Pet 🐾 Fetcher

★ Built as a team, assumed a leadership role.

★ Pet 🐾 Fetcher is an application where users can list their puppies for adoption or connect with other users to adopt a pet of their own. Users can like and comment on posts and can list their pet, including uploading an image file.

★ Built out backend using mySQL, Sequelize, and Express, styled homepage (assisted in styling the rest of the application) and handled uploading of images, which are converted to data URLs and stored in the database as strings.

Social 👫 Network 🤖 API

★ A simple API built to be used as the backend for a social networking website, using MongoDB and Mongoose.

★ Create a user, add a user as a friend (will update friends list for both users), share your thoughts, and react to the thoughts of other users!

Employee-Tracker

★ E-T is an application designed to help clients manage a database of employees and managers.

★ Built using advanced mySQL queries, Inquirer, and Console.Table.

★ Created with the user experience in mind.

Professional Experience

Data Entry Clerk | Royal Palm Orthopedics | September 2018-Present | Lake Wales, FL

➔ Maximized office efficiency through filing patient charts and organizing folders and documents.

➔ Refined organization through uploading of patient documents to the database used to house patient info.

➔ Ensured all documents were entered perfectly, by taking a very detail-oriented approach.
